

# Challenges and Opportunities in Brazil's Renewable Energy Sector

## CONTENT

### BRAZIL

- 1. Key Country Data**
  - 1.1 Political and Economic Outlook
  - 1.2 Primary Energy Source Overview
    - 1.2.1 Crude Oil and Petroleum Products
    - 1.2.2 Natural Gas
    - 1.2.3 Steam Coal and Metallurgical Coal
    - 1.2.4 Uranium
  - 1.3 Electricity Supply
    - 1.3.1 Brazilian Electricity Consumption
    - 1.3.2 Installed Capacity
    - 1.3.3 Electricity Supply by Source: Fuel Mix
    - 1.3.4 The Electricity Grid
    - 1.3.5 Rural Electrification
- 2. Political and Regulatory Energy Framework**
  - 2.1 Energy Policy
    - 2.1.1 Regulatory Framework
    - 2.1.2 Incentives for Renewable Energy: PROINFA
    - 2.1.3 PAC2
- 3. Brazil's Renewable Status and Development Potential**
  - 3.1 Introduction
  - 3.2 Hydropower
    - 3.2.1 Installed Capacity
    - 3.2.2 Potential
  - 3.3 Biomass
    - 3.3.1 Biomass for Power Generation
      - 3.3.1.1 Potential
      - 3.3.1.2 Installed Capacity
    - 3.3.2 Biofuels
      - 3.3.2.1 Ethanol Fuel
      - 3.3.2.2 Biodiesel
  - 3.4 Wind
    - 3.4.1 Installed Capacity
    - 3.4.2 Potential
  - 3.5 Solar
    - 3.5.1 Solar PV
    - 3.5.2 Potential
    - 3.5.3 Solar Water Heating
  - 3.6 Geothermal
    - 3.6.1 Installed Capacity
    - 3.6.2 Potential

#### **4. Main Players in Renewable Energy Production**

- 4.1 Energy Producers
  - 4.1.1 Utilities Overview
- 4.2 Renewable Energy Components Manufactures
  - 4.2.1 Hydro Sector
  - 4.2.2 Biomass Sector
  - 4.2.3 Wind Sector
  - 4.2.4 Solar Sector

#### **5. Financial Outlook for Renewable Energy Projects**

- 5.1 Main Financial Institutions Active in Renewable
  - 5.1.1 The BNDES
  - 5.1.2 Banco de Nordeste
- 5.2 Potential Brazilian-Italian Collaboration
  - 5.2.1 Energy Recovery from Waste
    - 5.2.1.1 Biogas
    - 5.2.1.2 Waste to Energy
  - 5.2.2 Hydro
  - 5.2.3 Solar Technology
  - 5.2.4 Wind Technology
- 5.3 The Enel Green Power success case
