

## CONTENT

### CHINA

<b>1. Key country data</b>	2
1.1. Natural energy resources	3
1.2. Import/export of natural resources	3
1.3. Electricity supply: installed capacity, energy demand, and fuel mix	3
1.3.1. <i>Fuel mix breakdown to date: conventional thermal sources</i>	4
1.3.2. <i>Hydropower and renewables</i>	5
1.3.3. <i>Nuclear</i>	5
1.4. Investments	6
1.5. Consumption and production rates by fuel	6
1.5.1. <i>Oil</i>	6
1.5.2. <i>Natural gas</i>	8
1.5.3. <i>Coal</i>	9
<b>2. China's renewable status and development potential</b>	10
2.1. Wind power	10
2.1.1. <i>Investments and market overview</i>	11
2.1.2. <i>Innovation</i>	12
2.1.3. <i>Barriers to further advancement</i>	12
2.2. Solar: SWH and Photovoltaic	13
2.2.1. <i>Photovoltaic</i>	15
2.2.2. <i>Investments</i>	16
2.3. Hydropower	16
2.3.1. <i>Hydro resources</i>	17
2.4. Biomass	18
2.4.1. <i>Investments</i>	20
2.5. Geothermal	21
<b>3. Policies</b>	21
3.1. Relationship between economic and energy policy in China	21
3.2. Governance models and key actors	25
3.3. Brief description of the main measures that regard renewable energies	27
3.3.1. <i>Main measures and state of implementation</i>	29
3.4. Inward FDI: theory and policies	32
3.4.1. <i>FDI rules favoring partnerships</i>	33
<b>4. Actual and future prospectives on Sino-Italian RE collaboration</b>	34
4.1. Potential Sino-Italian collaborations	36
4.1.1. <i>Success case and potential Sino-Italian partnerships</i>	36
4.1.2. <i>Reflections on mini and micro wind development projects</i>	38
4.1.3. <i>Main applications and classifications</i>	39
<b>Appendix</b>	45
